Re: Docket W-02105A-13-0415 Decision 74755

The Company is filing comments to the recommendations of the proposed order for the Compliance filing of the Company for approval of Best Management Practice Tariffs.

The proposed order to mail our customers a notice regarding the BMP tariffs and their effective date would be expensive, time-consuming and was not included in our cost projections to implement the BMPs. The Company has been having financial difficulties since last June and there are concerns about making it through until the spring without getting behind on our bills.

We would like to propose alternative methods that would be less expensive for notifying our customers about the BMP tariffs. Customers could be notified of the BMPs & the availability of water conservation materials by printing a message on the bills. Additionally, the Company is about to start a website where all Company information will be available. This will be printed on the bills as well.

If we are required to mail a notice to all of our customers, we would like to add the costs for this to the cost projections which have already been filed. The estimated cost of doing a mailing to 660 customers is \$220.20. The estimated breakdown of this expense is \$95.20 for printing and office supplies, and \$125. for labor.

Please let me know if you have any questions.

Respectfully,

Michelle Sharp
Business Administrator
Mt. Tipton Water Co.
